LUDLOW TUART FOREST RESTORATION GROUP

Camping Rules

Ludlow Forest RV Park

Simple, low-key camping in the last tall tuart forest. Thanks for helping us look after it.

VEHICLES	SITES	CHECK IN / OUT	MAXIMUM STAY
Fully self-contained only	**2 sites · under 9 m · up to 5 people**	**In 2pm–8pm · Out 12pm**	**5 nights**

Self-contained vehicles only

- Your vehicle must have its own toilet, shower and waste tanks. Bookings without these cannot be accommodated.
- One shared flush toilet is located beside the laundry. Please treat it as a backup only. It is not wheelchair accessible.
- There are no showers, power or bins.

Water and waste

- Site taps are **not drinking water**. Drinking water is available at the mill compound. Arrive with a full tank and bring a jerry can for top-ups.
- Do not empty grey or black water anywhere on site. The river here flows into a protected wetland.
- No dump point on site. The nearest is in Capel, on Buchanan Road off Capel Drive.
- Please take all rubbish with you.

Your stay

- Park facing the exit so you can drive straight out without anyone moving another vehicle.
- Quiet hours 10pm–7am.
- No generators. Gas BBQs and stoves are fine.

Heritage buildings

The old cottages and mill buildings are unsafe. **Please don't enter them.**

Fire safety

BUSHFIRE SEASON DECEMBER–MARCH

- **No campfires, wood fires or charcoal at any time.**
- On Total Fire Ban days, follow DFES rules. Check Emergency WA or call 13 33 37.
- The site closes on Catastrophic Fire Danger days. If one is forecast during your stay, we will cancel and give you a full refund.
- In a bushfire, the only plan is to **leave early**. There is no safe shelter on site.
- **Three short blasts on the air horn** mean an emergency. Go to the muster point at the main entrance and wait for instructions.
- Evacuation routes: Busselton (Geographe Leisure Centre), southwest on Ludlow Road North, about 15 min; or Capel (Capel Community Centre), northeast on Ludlow Road North, about 10 min.
- Please install the Emergency WA app before you arrive.

Wildlife and the forest

- Dogs are welcome on a lead at all times. Fox baits may be laid in the surrounding State Forest and are lethal to dogs. Don't let your dog pick anything up.
- This is home to the endangered western ringtail possum, quenda and phascogales. Use a red-light torch at night and don't feed wildlife.
- Snakes are active in warmer months. Keep to cleared ground and wear closed shoes. For any bite, call 000.
- Tuart trees can drop limbs without warning. Don't park or camp under overhanging branches, especially in strong wind.
- Mosquitoes here can carry Ross River virus, mainly July–December. Use repellent and cover up at dawn and dusk.
